Joelle,

what is the status of the Solar Winds Mine **S/023/0061** UTU-75879? The Division has it listed as suspended because they do not have a current notice with the BLM.

Operator stated in annual report that mining had occurred.

Thank you for including the UTU number, that helped!

Our file shows the operator completed a plan. We requested a meeting to resolve a minor issue in January and met with the operator to discuss a resolution (painted a rock instead of installing approved signs). Our records show it as authorized.
